

# UNDER CONSTRUCTION

## Route 210 paving continues

Freeway lanes between Linden and Pepper Avenues in Rialto now have a first layer of concrete, and crews are preparing to place the second layer this week.

This first layer, called lean concrete base or LCB, is complete on the westbound lanes. On the eastbound lanes, LCB has been placed on the shoulder, carpool lane and fast lane. The eastbound #1, #2 and #3 lanes will remain unpaved for construction vehicle access.

The second layer of pavement — asphalt concrete — will be placed on the westbound lanes starting this week. Crews will pave a test strip of the third layer of concrete — portland cement concrete — and test its strength before paving the westbound lanes. Work on the eastbound lanes will occur at a later date.

Paving also will begin later this month on smaller freeway sections in San Bernardino. This work will occur near the bridge at Little Mountain Drive, ramps at State Street and freeway lanes between Cajon Boulevard and State Street.

Paving will continue throughout the fall and winter.

**Right: Crews use a Gomaco slip-form paver to pave freeway lanes between Ayala Drive and Linden Avenue in Rialto.**

## Drainage work to occur this fall on Casmalia

Drainage improvements on Casmalia Street near Lilac Avenue in Rialto are scheduled to start this fall. Heavy rain caused flooding in the area earlier this year, prompting the redesign of the storm drain system along Casmalia.

Crews will remove curbs and gutters and install drainage inlets and pipe beneath the street. Work will be performed during the day, and steel plates will be added at night for vehicle access. Some full street closures may be needed during the 3-4 week project; traffic will be detoured to Cactus at that time.

To add or remove your name from the Under Construction email list, please send your request to [cdonahue@sanbag.ca.gov](mailto:cdonahue@sanbag.ca.gov) or call 1-866-HELP-210. This bulletin is a feature of the Route 210 Public Information and Safety Program. **Safety, It's No Accident!**

## I-215/Route 30 connector to remain closed until November

The connector ramp between southbound Interstate 215 and eastbound Route 30 will remain closed until mid- to late November for additional construction work. This closure was extended from September 29.

Crews are completing the outside pavement widening before the ramp reopens next month.

Until that time, drivers should stay on I-215 past the interchange with Route 30 and exit at the 27th Street/Mt. Vernon off-ramp. They should turn west onto Highland Avenue and turn northeast (right) to enter eastbound Route 30.

A separate connector ramp — between eastbound Route 30 and northbound I-215 — will remain closed until the freeway opens next year.

Motorists should follow detour signs for both ramp closures and allow extra travel time through this area.
